Thoughts for the Week:

“Educators work in a field steeped in tradition. Schools are filled with practices we’ve been doing for decades, and many days we wonder why we’re doing so many things the way we’ve always done them. Sure traditions can be an important part of our schools’ culture, but when it comes to learning, using decades-old tactics won’t cut it. We can’t expect our kids to be growing, learning, and pushing boundaries unless we’re doing the same. How dare we ask our students to show up every day and learn if we’re not learning and pushing ourselves?”

(Kids Deserve It, Todd Nesloney and Adam Welcome)

PLC’s are key...collaborating, growing, learning!
